

# The Fairway Snake<sup>®</sup>

## The Best Tool Available for Dragging Fairways!

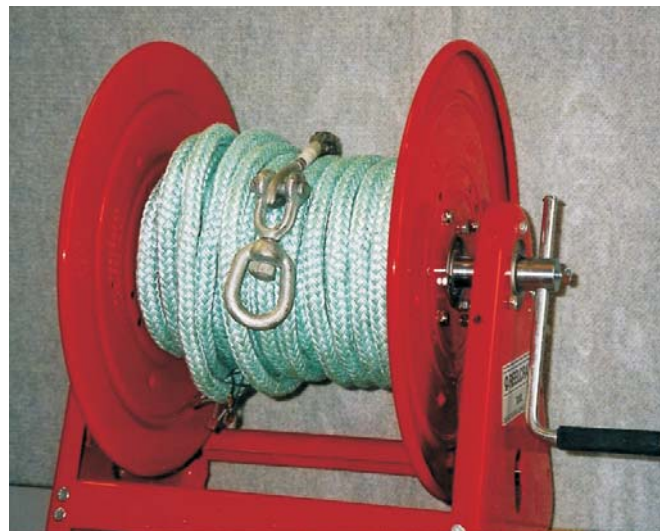

- ★ Knocks down dew.
- ★ Reduces disease pressure.
- ★ Breaks up grass clippings and worm castings.

### **Cory Janzen - Superintendent: Westmount Golf and C.C.**

*"The Fairway Snake is a valuable tool that every superintendent should have. When there is heavy dew, the golf course is presented much drier and playable for early morning golfers. Promoting dry turf early in the morning reduces disease infections as well."*

### **Martin Kopp - Superintendent: Lionhead Golf & C.C.**

*"Lionhead is a very busy 36-hole facility. It is hard to have everything perfect for first thing in the morning, especially the many acres of fairways. The Fairway Snake makes me look like a hero by knocking down the heavy dew. I also find that the Fairway Snake assists in many areas; disease suppression, clipping dispersal, and helps stand up the turf for a better cut. Snaking my fairways is on the same priority level as cutting greens and changing holes"*

Available in 100, 150, and 200 ft  
Lengths or Custom-Cut to your  
Specifications.
