

Use the powerful systemic action of Banner MAXX for summer disease control

- Banner MAXX provides broad spectrum protection against Dollar Spot, Brown Patch, Anthracnose, Red Thread, Summer Patch, Leaf Spot and Melting Out
- Banner MAXX works systemically to provide long-lasting protection - up to 28 days
- Banner MAXX won't wash off with rainfall or irrigation once it is inside the plant
- Banner MAXX features the very low odour and easy-to-use MAXX formulation. The particle size of the active ingredient is ~25 times smaller than a flowable or wettable powder formulation, allowing for superior turf coverage and uptake into the plant
- Banner MAXX is tank mix friendly with many registered tank mix partners like Daconil ULTREX, Primo MAXX, Heritage MAXX or Daconil Flowable
- You can earn 800 GreenPartners points per case.

How to Use Banner MAXX

Apply Banner MAXX @ 26-51 mL/100 m² for 21 to 28 days of protection.

Use the tried, tested and true contact action of Daconil ULTREX for summer disease control

- The multi-site mode of action of Daconil ULTREX provides broad-spectrum protection against Dollar Spot, Anthracnose, Brown Patch, Leaf Spot and Melting Out without any concerns of developing resistance
- The WeatherStik component in Daconil ULTREX adheres the active ingredient to the plant surface where it acts as a powerful inhibitor of spore germination
- The Daconil ULTREX easy-to-use formulation pours and measures simply, dissolves quickly into suspension, and minimizes rinsing resulting in a time savings
- You can earn 200 GreenPartners points per case.

How to Use Daconil ULTREX

Preventatively – apply Daconil ULTREX @ 58-115 g /100 m² for 7 to 14 days of protection
Curatively – apply Daconil ULTREX @ 115-212 g/100 m² for 7 to 14 days of protection

Tank Mix the Winning Combination of Banner MAXX & Daconil ULTREX for:

- Long-lasting disease protection with both contact and systemic activity in a single application
- Double protection against toughest turf diseases like Dollar Spot, Anthracnose and Brown Patch
- Tank mixing these great products is one of the commonly used strategies to avoid reduced sensitivity and fungicide resistance.

How to Use Banner MAXX & Daconil ULTREX

Apply Banner MAXX @ 26 mL/100 m² + Daconil ULTREX @ 73-115 g/100 m². Add your regular rate of Primo MAXX and save a trip out with the sprayer.
