

SENATOR[®] WSB

NEW!
WATER SOLUBLE BAGS

SYSTEMIC FUNGICIDE Containing 70% Thiophanate Methyl

This quick dissolving wettable powder is now available in **water soluble bags (WSB)** to make the mixing and loading of Senator 70WP quick and easy!

Senator WSB is a **cost effective, broad-spectrum** fungicide for controlling diseases on golf course greens, tees, fairways and other turf areas. Senator is safe on all commonly grown turfgrass species in Canada. The active ingredient, thiophanate methyl, has been a trusted preventative and curative disease control tool for the past 30 years.

Senator WSB is **systemic**, so it protects the plant from the inside out. It is absorbed by roots, crowns and shoots to protect the plant from disease for 14 days.

Senator WSB is from the benzimidazole class of fungicides, which means that it disrupts cell division in the fungal cells. It's the **only benzimidazole** on the market which makes Senator WSB an **excellent choice for rotating** with the newer classes of fungicides. Senator WSB remains a **great dollar spot product** on newer golf courses with no history of benzimidazole resistance. Fungi can develop resistance to fungicides after repeated, continuous use. To avoid resistance, tank mixing and alternating fungicides is recommended.

Disease Controlled	Grams / 100m ²	oz / 1000ft ²	Spray Schedule
Dollar Spot <i>Sclerotinia homeocarpa</i>	25-30	.8 - 1	Repeat every 10-14 days as required.
Brown Patch <i>Rhizoctonia solani</i>	30-60	1 - 2	Repeat every 5-7 days as required.
Powdery Mildew <i>Erysiphe graminis</i>	125-250	4.1 - 8.2	Repeat every 14-21 days as required.
Pink Snow Mould <i>Microdochium nivale</i>	125-175	4.1 - 5.7	Repeat when required.

Rediscover the benefits of this broad-spectrum, systemic turfgrass fungicide.
